

METRO ROAD SYSTEMS

Research; Simulation ;Development
and Demonstration Centre

What is Mock lane ?

- Is a place where an exact replica of toll lane, parking lane or even any other systems can be simulated.
- Also termed as Demo or Research lane.
- A full functional system setup is created with original equipments mounted in place.

Why Mock Lane ?

- Can be utilized for showing demo of products or systems to Clients.
- Can be utilized as test bench for implementing innovative ideas.
- Provides a place where each & every equipment or software can be tested before installation at site.

Advantages of Mock Lane

- Physical touch & feel enhances the confidence of the buyer before investing.
- Provides a platform for effective marketing.
- Can generate a real time test simulator thus making systems more immune to errors.
- Acts as a workbench for analysis of all the practical problems which can happen at site.

Systems present In Mock lane

- Toll Management System
- Parking Management System
- ECB System
- Video Incident Detection System
